CORPORATE GIFTS 2018

VICTORINOX 1884-2018 MORE THAN 130 YEARS OF EXPERIENCE AND LIVED SWISS TRADITION

"A Victorinox product is a companion for life. Since our company was founded in 1884, we have always settled for nothing less than the highest quality. When you hold a Victorinox product in your hand, you can feel this immediately. So it should come as no surprise that they are often chosen as corporate gifts.

They are a symbol of generosity and bring pleasure wherever they go. I am delighted to invite you to take full advantage of this enduring statement of quality and to benefit from our more than 130 years of company history and over 100 years of experience in manufacturing corporate gifts".

Carl Elsener
CEO Victorinox

Carl Elsener

VICTORINOX MILESTONES

1884 With the active support of his mother Victoria, Karl Elsener I opens a cutler's workshop in Ibach-Schwyz.

1891 Karl Elsener I establishes the Association of Swiss Master Cutlers and, as a result, is able to deliver the first major order of soldier's knives to the Swiss Army.

1897 The Original Swiss Officer's and Sports Knife is patented. Today, it is known all over the world as the "Swiss Army Knife".

1909 Following the death of his mother, Karl Elsener launches the brand name "Victoria" as a tribute to his mother and registers the emblem with the Cross and Shield as a trademark. It is now a registered trademark in more than 120 countries.

1921 The invention of stainless steel is a significant development for the cutlery industry. "Inox" is the international term for stainless steel. The combination of the

two words "Victoria" and "Inox" gives the name of the company and brand today – Victorinox.

1931 Carl Elsener II introduces automation in the company. In 1931, Victorinox commissions the company Brown Boveri to set up the world's first fully electric hardening plant in Ibach. This means that all knives can be guaranteed to be of a consistent high quality.

1945 The Swiss Army Knife starts on its journey to conquer the world. The U.S. soldiers stationed in Europe buy it in large quantities and it becomes a popular souvenir to take home.

1950 After the death of his father, Carl Elsener III takes the company's management into its third generation.

1979 The sole proprietorship "Messerfabrik Carl Elsener" is changed into the family company "Victorinox AG".

1984 The company doubles its manufacturing and office space. 810 employees generate sales of over 80 million Swiss francs.

1989 Under its Swiss Army brand, Victorinox enters the North American watch business with its U.S. sales partner at the time.

1992 Victorinox opens its first sales subsidiary in Japan. Others are added in subsequent years.

1999 Victorinox joins forces with the American TRG Group in St. Louis as licensee and enters the international travel gear market.

*The Original Swiss
Soldier's Knife of 1891*

*The Original Swiss Officer's and
Sports Knife, patented in 1897*

2000 The Victorinox Foundation is established. It holds 90% of the share capital of Victorinox AG. A further 10% is held by the charitable "Carl and Elise Elsener-Gut Foundation".

2001 Victorinox launches a clothing line in the USA and the first Victorinox store opens in New York's SoHo district.

2005 Victorinox acquires the well-established Swiss knife and watch manufacturer Wenger SA in Delémont and allows it to operate as an independent subsidiary.

2007 Carl Elsener IV takes over the running of the business from his father and further expands Victorinox as a global multi-product brand.

2007 Following the establishment of Victorinox Swiss Army Fragrance AG, the former Wenger perfume line is repositioned.

2008 Victorinox opens its first flagship store in Europe on New Bond Street in London.

2013 Victorinox integrates the Wenger knife business into the Victorinox brand.

2013 Carl Elsener III dies on June 1st, shortly before his 91st birthday.

2014 Victorinox acquires the travel gear business from the previous licensee TRG Group and establishes the new business unit Victorinox Travel Gear AG.

2014 The company celebrates its 130th anniversary.

2016 Victorinox establishes a presence in the international watch business by investing in the development of a watch competence center in Delémont.

2017 Victorinox produces their 500 millionth pocket knife.

Today

Victorinox is now managed by the fourth generation of the Elsener family. The product range is now available at more than 50 000 points of sale around the world. In addition, the complete Victorinox brand can be experienced in around 80 brand stores and shop-in-shops.

LOVE AT FIRST SIGHT

For more than 130 years, the Victorinox name has stood for highly valued products with unmistakable design and uncompromising quality. We have manufactured promotional products for just as long and we now know: Whether you are presenting a Victorinox pocket knife, a tool, or a kitchen knife – you will always receive a look of true joy in return.

High-quality and stylish The basic principle for all corporate gifts: They should express an appropriately high value. Victorinox products are manufactured with the highest levels of precision, using high-quality materials such as steel, aluminum and wood. When you hold a Victorinox product in your hand, you immediately feel its quality and intrinsic value.

Popular Whether your customers appreciate the practical side of things or cherish design and elegance above all else, our products always exude a “must-have” feeling. Victorinox products are loved by

people all over the world, irrespective of their age, gender or cultural background.

Well-known We proudly look back on more than one hundred and thirty years of Swiss tradition. Victorinox is a highly reputable brand. “Trustworthy” is an attribute where we score very well in market studies. Here is one of the reasons: Today, we still manufacture all of our knives in Switzerland.

Multi-talented From a simple promotional item to an exclusive brand ambassador: With the unsurpassed depth of our product

range, Victorinox truly offers a corporate gift solution for every need.

The wide selection of tools and scale variants, as well as the many available inscription options, give both you and us many choices for creating a special product, customized to reflect your corporate image as well as your budget requirements, while the iconic design also retains its timeless appeal.

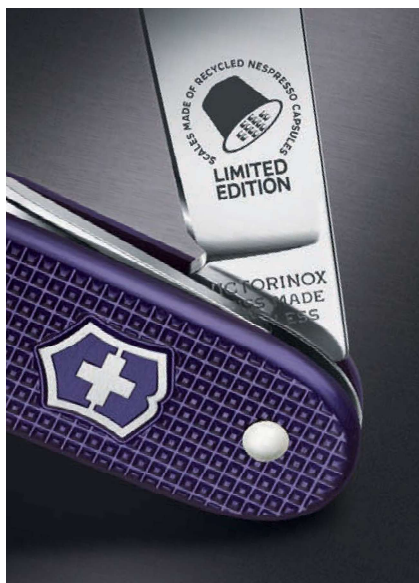

A LASTING IMPRESSION

Victorinox products are exceptionally robust and long-lasting and the Swiss Made label guarantees a powerful and positive image transfer.

As we have always done, we guarantee an extremely good price-quality ratio.

That is what makes Victorinox products such popular promotional items for the long term.

A fine example of a successful partnership: Victorinox and Nespresso

A long-lasting message A Victorinox Swiss Army Knife fits comfortably in any pocket, a Swiss Tool fits in any drawer. For your customers, this means Victorinox products become companions for life, serving as a permanent reminder of how your brand is there to meet their needs.

Indestructible Our products are built to last, for now and forever. That means there's a good chance your promotional item will be handed down to the next generation.

But if something does go wrong with your product, you will receive no-nonsense full service and replacement parts at any time. In the case of pad or digital printing, we apply a special protective lacquer and can guarantee abrasion stability by a factor of >100. We also provide a lifetime guarantee for material and manufacturing defects.

Timeless Victorinox products are proud recipients of a number of design awards. Our pocket knives feature in the permanent exhibits of renowned museums such as the MoMa in New York and are considered design icons. The highest level of quality Swiss craftsmanship can withstand practically a lifetime of use, while the iconic design also retains its timeless appeal.

Presented with pride People love to show off a Victorinox pocket knife, tool or kitchen utensil. It is a promotional item that you and your customers can truly be proud of.

Sustainable As a family company, sustainability is very close to our hearts. We have already received a number of awards in recognition of our environmentally-responsible practices, both in our production processes and how we treat our employees and suppliers. You can therefore feel reassured when you give away our products. With more than 130 years of success, you can feel confident and count on a long-term partnership based on our historic experience.

INSCRIPTIONS

THE BRAND FOR BRANDS

MULTI-TALENTED
ELEGANT
DURABLE

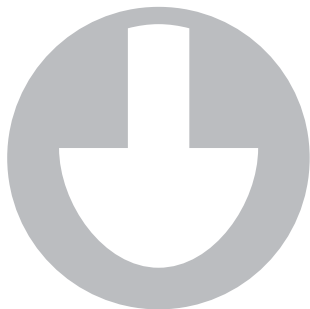

The wide and comprehensive range of Victorinox corporate gifts is complemented by perfectly matched customized upgrade options. The main focus of our promotional products is premium quality, to ensure they leave a lasting impression. The entire procedure, from pre-printing to the imprinting process, is done in-house, ensuring that you can rely 100% on professional advice and execution.

We offer nine different options for imprinting your logo or claim and no matter which one you choose, your expectations will be fully met.

The company logos printed herein are shown for demonstration purposes only and remain property of the respective company.

TAMPONPRINT

Today, over 90% of the printing jobs we carry out at Victorinox use the tamponprint process (pad printing). Whether it's spot color printing using up to 6 colors, or 4-color photo printing (CMYK), your logo will meet your CI guidelines exactly. In both procedures, color is lifted with an elastic stamp from a steel plate (with an etched-in image) and transferred to the object to be printed.

Exception: Evolution only with 1-color pad print

PROTECTIVE LACQUER

All pad printing on Cellidor scales is protected with a high-gloss lacquer. Thanks to this hard lacquer, the prints are highly resistant to abrasion and chemical substances. This procedure is environmentally friendly and the lacquer is food safe. The protective lacquer increases the abrasion stability of the prints by a factor of >100.

Applicable on: Cellidor brilliant

Exceptions: Scales including ballpoint pen or LED switch, Evolution, Silver Tech

DIGITAL PRINT

We have used this procedure to successfully enhance our pad printing process for some time now. This new printing solution is most suitable for full-panel printing and halftones and/or finely detailed prints. It is mainly used for the areas where pad printing reaches the limits of its capability. Since pre-printing procedures such as the development of color separations or plates are unnecessary, this process is eco-friendly. Moreover, digital information can be stored or modified more easily.

Digital prints are also treated with our benchmark protective lacquer technology, which enables an increase in the abrasion stability by a factor of > 100 . The same application exceptions apply to digital printing as for pad printing.

Matt Nylon 111 mm, two-component 111 mm and the Golf Tool are not compatible for digital printing as of now.

In addition, the colors silver and gold cannot be reproduced via digital printing.

DIGITAL HAPTIC 3D

3D

Printing is generally a two-dimensional medium and also optically flat, since up to now the digital processes were limited to colored inks.

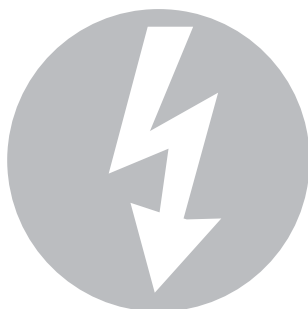

It was only recently, with the introduction of clear ink, that unique new enhancement options became possible: Raised surfaces that feel realistic to the touch, such as canvas, leather, animal skin, etc., convey a completely new tactile look and a 3D experience, while maintaining the benefits of regular digital printing. High-gloss is not a must, since the lacquer also comes in a semi-gloss and matt finish.

However, since the clear lacquer is applied to selected areas, the additional Victorinox protective coating can no longer be utilized. The abrasion stability is still high and is not degraded by the clear lacquer in any way.

ETCHING

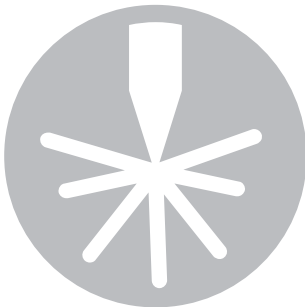

The perfect procedure to decorate all blades and Swiss Tool scales with permanent adornments. The inscription takes place by electrolytic oxidation (electrolyte and etching current). The decoration appears in anthracite/dark grey and offers outstanding durability.

LASER ENGRAVING

Laser engraving is suitable for a range of surfaces. On wood and rubber, this decoration method creates a perception of depth, making it perceptible to the touch. On metal, the lettering and logos appear on the surface in an anthracite/grey color. In general, the laser engraving features high wear resistance.

ALIFOND

IMPRINT ON ALOX SCALES

A silicone stamp is used to transfer ink from the engraved steel printing block to electrochemically treated and thus microscopically porous aluminum scales. The surface is then sealed and the ink particles become enclosed in a wafer-thin anodized layer. This anodized layer is scratch- and impact-resistant. Multi-color printing of imprints is also possible with this process. Color matching with customer-specific colors is limited. For imprints on Alox knives, the imprint area is located on the back.

Exceptions: Imprint in white is not possible

METAL INLAY

The logos and wording are created photochemically with chromium steel and then pressed at high temperatures flush into the scales. This imprinting method features long-lasting durability and a high-quality appearance.

Exceptions: Transparent scales, scales with LED switch, scales including ballpoint pen

GOODYEAR

HOT STAMPING

Stamping a design is done with the help of a brass die stamp and stamp transfer foil, as well as with heat and pressure. Suitable for 1-color reproduction of simple logos and narrow fonts. Colors: Silver, white, gold, blue, red, black, and green (standard colors only)

For small quantities, 5 standard fonts are available and die stamp costs are waived.

Exceptions: Scales with LED switch, scales including ballpoint pen

ENGRAVING

A tool cuts the letters into the material. On plastic surfaces the engraving cavity is then filled with a contrasting color. Logos and lettering are also possible for diamond engraving on Swiss Tools. This method is also ideal for decorating blades and wood scales with individual names in our standard font.

Suitable for small runs

Exceptions: Evolution Grip scales, two-component scales, Ranger Grip scales, Alox scales

FILE DELIVERY

ELECTRONIC FILES:

ARTWORK FOR COMPANY LOGOS

Text fonts and illustrations must be converted to paths. The colors must be defined precisely using Pantone, RAL, or HKS numbers.

SWISS MADE

LARGE POCKET KNIVES

STAY IN CONTROL

ROBUST
ERGONOMIC
INNOVATIVE

When we developed our large pocket knives, our main priorities were to make it safe, functional and robust. That's why all of our models are fitted with a reliable locking system for the main blade. There are also built-in stabilising settings for some of the tools and firm grip ergonomic scales. So when you want or need a little bit extra in reserve, our large pocket knives have to be your first choice.

LARGE POCKET KNIVES

WOOD

VALUABLE AND NATURAL: WOOD

SUSTAINABLE
APPEALING
SPECIAL

Wood has a simple yet special appeal: It feels good in your hand, it is unassuming yet elegant and it is renewable. The wood we use for our knife scales actually comes from walnut trees that grow right here in Europe.

No matter which functions our pocket knives are designed to carry out, the unique grain in every single one of our wood scales makes that product one of a kind, with its very own special character.

SWISS CARDS

THE POCKET KNIFE IN A DIFFERENT FORMAT

MODERN
SMART
ONE OF A KIND

Swiss Cards are full of hidden talents and still fit perfectly into the credit card slots in standard wallets. Any one of the four models will prove a loyal daily companion and you can literally feel the quality and value. They are perfect for anyone looking for something practical, but with a unique twist, which in this case is clearly the inspiring design that has won several awards on the international stage.

SWISS MADE

STAINLESS STEEL

All steel blades are made of martensitic stainless steel. The basis for optimum function and durability of a blade is the use of the correct steel alloy. The steel should deliver the perfect combination of cutting edge retention and corrosion protection. It should also be flexible so it does not break during use.

The following steel alloys are used for Swiss Army Knives:

MATERIAL NO.	FOR	ABBREVIATION DIN	C (%)	CR (%)	MO (%)	V (%)
1.4110	blade	X 55 Cr Mo 14	0.48–0.60	13.0–15.0	0.50–0.80	≤ 0.15
1.4021	spring	X 20 Cr 13	0.16–0.25	12.0–14.0		
1.4031	tool	X 39 Cr 13	0.36–0.42	12.5–14.5		0.1–0.2

The following steel alloys are used for household and professional knives:

MATERIAL NO.	ABBREVIATION DIN	ABBREVIATION AISI	C (%)	CR (%)	MO (%)	V (%)
1.4419	X 38 Cr Mo 14	420	0.38	14	0.8	
1.4034	X 46 Cr 13	420	0.43–0.50	12.5–14.5		
1.4110	X 55 Cr Mo 14	440 A	0.48–0.60	13.0–15.0	0.50–0.80	≤ 0.15

All Victorinox alloys are in accordance with Regulation (EG) no. 1935/2004 for products that come into contact with food

SUSTAINABILITY

Since decades issues concerning environmental protection and sustainability have been given high priority at Victorinox.

100% RECYCLED STEEL

SCALE MATERIALS

Cellidor CP	<p>Cellidor is an organic, thermoplastic cellulose ester that incorporates a high proportion of renewable natural cellulose material. Unlike traditional plastics, it is only partially dependent on fossil fuels. Components made of Cellidor exhibit an exceptional high-gloss finish with perfect depth effect. To improve abrasion and scratch-resistance, scales printed with a special promotional motif are treated with a protective coating.</p> <p>Max. usable temperature 65 °C.</p>	Classic, Companion, Swiss Card, Evolution, Swiss Army Knives
Acrylonitrile butadiene styrene ABS	<p>Acrylonitrile butadiene styrene is an amorphous thermoplastic. ABS plastics exhibit excellent toughness, notched impact strength, impact strength, flexural rigidity and surface hardness.</p> <p>Max. usable temperature 80 °C.</p>	Classic, Compan- ion, Swiss Card, Evolution, Swiss Army Knives
Polyamide PA	<p>Nylon is a term commonly used primarily in the U.S. to describe polyamides (PA). Polyamides are suitable for pocket knife scales because they exhibit better mechanical abrasion resistance. This also has benefits from a production perspective. Compared to high-gloss and smooth Cellidor components, they have a more structured surface.</p> <p>Max. usable temperature 90 °C.</p>	Workman, Ranger Grip, Evolution Grip
Aluminum ALOX	<p>Alox scales are punched from aluminum, embossed and then anodised in a subsequent process stage. The Eloxal process uses anodic oxidation to create a protective layer. This layer of oxide is hard and protects the scales from damage and corrosion, up to a certain degree.</p>	Alox
Walnut wood WOOD	<p>Wood is a natural, renewable resource. The walnut wood used by Victorinox comes from Swiss forests and is in full compliance with EU Regulation No. 995/2010 (the EU Timber Regulation). The wood of the walnut tree is very solid, tough and strong.</p>	Wood, Wine Master
Olive wood WOOD	<p>Wood is a natural, renewable resource. The olive wood we use at Victorinox is sourced from Italy and complies with the EU Trading Regulation (EUTR) 995/2010 on timber. The wood from the olive tree is very heavy and hard and has good density characteristics.</p>	Wine Master

MATERIALS

Polypropylene PP	<p>Polypropylene exhibits good strength, rigidity and hardness. It is suitable for sterilisation and can be used at temperatures of up to 80–100 °C.</p>	Swiss Classic
Thermoplastic Elastomers TPE	<p>TPE combine the easy processing of thermoplastics with the beneficial properties of elastomers. They are extremely flexible over a wide range of temperatures, very strong and benefit from good impact and notch impact strength, even at low temperatures. TPE materials can be used at temperatures of up to 80–110 °C.</p>	Swiss Classic

CLEANING AND CARE

MULTI-TOOLS

For dirty and sticky blades, we recommend opening and closing the blades several times in warm water until they move freely. Allow to dry completely. Add a drop of oil between the blades and the tool casing or springs as well as other friction surfaces. Multi-Tools should never be cleaned in a dishwasher.

We recommend:

Multi-Tool Oil (item number 4.3302)

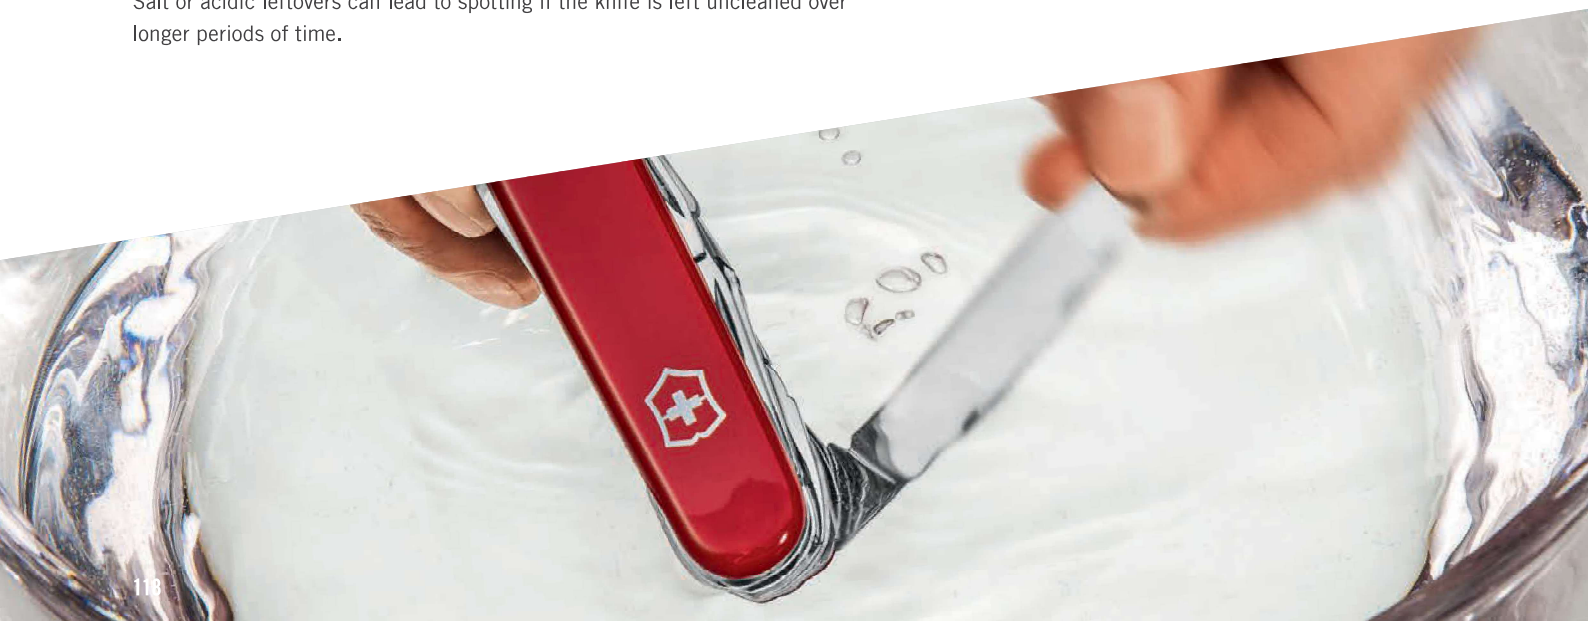

Key features:

- Maintains tool mechanics
- Protects against corrosion
- Meets NSF H1 requirements

HOUSEHOLD AND PROFESSIONAL KNIVES

Victorinox recommends rinsing knives under running water directly after use. Salt or acidic leftovers can lead to spotting if the knife is left uncleaned over longer periods of time.

WARRANTY-, REPAIRS- AND SERVICES

VICTORINOX WARRANTY

Victorinox AG guarantees all knives and tools to be of first class stainless steel and also guarantees a life time against any defects in material and workmanship (save for electronic components 2 years).

Damage caused by normal wear and tear, misuse or abuse are not covered by this guarantee.

- **A service charge may apply for repairs and services** that are not covered by the warranty.
 - **Our standard warranty** repair includes replacement of parts that are broken, bent or suffer from general wear and tear. All other parts will be polished.
 - **If there are tool parts of sentimental value**, that you do not want replaced or if you wish for a part or parts to be returned, please state this in written form.
 - **If you are from Switzerland**, please contact your local retailer or send us your tool, well packed, directly to our repair department:
- VICTORINOX AG**
Reparatur-Abteilung
Schmiedgasse 57
CH-6438 Ibach-Schwyz
- **If you are from Germany, Austria, Belgium or Luxemburg**, please contact your local dealer or send us your tool, well packed, directly to our repair department:
- VICTORINOX AG**
Auslieferungslager
Reparatur-Abteilung
Alfred-Nobel-Strasse 5
DE-79761 Waldshut-Tiengen
- **If you are NOT from Switzerland, Germany, Austria, Belgium or Luxemburg**, please contact a local Victorinox representative or local dealer. They will be glad to assist you and possible mail delivery fees to and from Switzerland, are included in the warranty.

DECLARATION OF CONFORMITY

Victorinox, a family-owned company, and all its employees are bound by our own global Code of Conduct which is based on the company values and international standards. The Code of Conduct is a guideline for ethical, legally compliant and responsible conduct. Among other things, it defines how we do business and our commitment to sustainability, respect for human rights and environmental protection, as well as the rejection of corruption and forced or child labour.

Victorinox has implemented an effective quality management system and complies with all statutory requirements (such as the Product Safety Act (PrSG) and the EU Product Safety Regulation 2001/95/EG):

Materials	Regulation	Victorinox complies with the requirements
Metal: Steel/metal inlays	food contact	<ul style="list-style-type: none"> – under Regulation (EG) 1935/2004/EG on materials and articles intended to come into contact with food. – under Regulation (EG) 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food. <p>All materials are tested in accordance with acceptance test certificate 3.1 as per SN EN 10204. All requirements and guidelines comply with the provisions of the SN EN ISO 8442-1.de standard.</p>
Synthetic materials: Scales/handles	REACH	<ul style="list-style-type: none"> – under Regulation (EG) 1907/2006 (REACH). <p>All synthetic materials are free from polycyclic aromatic hydrocarbons (PAH).</p>
	Household knives	<ul style="list-style-type: none"> – under Regulation 1935/2004/EG and 10/2011 on materials and articles made of synthetic material that are intended to come into contact with food.
Electronic parts, LEDs, USBs, displays	RoHS WEEE ear	<ul style="list-style-type: none"> – under Regulation 2011/65/EG (RoHS). – under Regulation 2002/96/EG: Regulation on Waste Electrical and Electronic Equipment. <p>(WEEE). Victorinox is a registered partner of the Waste Electrical Equipment Register (ear): DE 70466424.</p> <ul style="list-style-type: none"> – under Regulation 2004/108/EG: Electromagnetic compatibility.
Wood	EUTR	<ul style="list-style-type: none"> – under EU Trading Regulation (EUTR) 995/2010 on timber.
Paint, clear lacquer, diluting agents	REACH	<ul style="list-style-type: none"> – under Regulation (EG) 1907/2006 (REACH).
Pouches	REACH Chromium content	<ul style="list-style-type: none"> – under Regulation (EG) 1907/2006 (REACH). – under Regulation (EG) 1907/2006, Appendix XVII, regulating the chromium VI content in leather products.
Packaging	REACH Green Dot ARA RESY	<ul style="list-style-type: none"> – under Regulation (EG) 1907/2006 (REACH). – the «Green Dot» is a label used in a packaging recycling system in Germany. Victorinox has been a member since 1993. – the Altstoff Recycling Austria (ARA), an Austrian waste packaging collection and recycling system. – RESY, the returns system for used transport packaging.

Etching, laser engraving, imprint on Alox scales, hot stamping, engraving	Products are food safe.

SWISS QUALITY

A product can be classified as «Swiss Made» if at least 60 % of production costs occur in Switzerland. The knives and tools produced by Victorinox are manufactured entirely in Ibach-Schwyz and Delémont. They are thus «Swiss Made» and this is shown on the blade or packaging.
